

International Business Machines Corp agreed to acquire Resilient Systems Inc
Monday, February 29, 2016 07:00:00 AM

International Business Machines Corp acquired Resilient Systems Inc for an undisclosed amount. The transaction would allow IBM to have the expertise and capabilities to help its clients resolve cyber breaches, across consulting, services and products. The platform offered by Resilient would provide IBM security analytics, forensics and vulnerability management, as well as incident response in connection to enterprise threat protection, response and detection. As part of the acquisition Resilient Systems Inc would join to International Business Machines Corp. IBM intends to retain the approximately 100 employee workforce of Resilient, including CTO, Bruce Schneier. Resilient Systems Inc is located in Cambridge, Massachusetts, United States and provides cyber security services. The company has 100 global clients, spanning over 20 countries. The deal was originally expected to close later this year, after regulatory approval has been granted. The legal advisors in the deal include: Cravath Swaine & Moore LLP for International Business Machines Corp.
