

**Collibra and Dell Technologies to Co-Present at the 2017 MIT Chief Data Officer and Information Quality Symposium**  
**Thursday, July 06, 2017 02:18:59 PM (GMT)**

NEW YORK, July 06, 2017 (GLOBE NEWSWIRE) -- [Collibra](#), a leader in data governance software solutions for business users, today announced that Dr. Pieter De Leenheer, Collibra co-founder and vice president, research and education, will be a featured speaker at the 11<sup>th</sup> annual 2017 MIT Chief Data Officer and Information Quality Symposium (MITCDOIQ).

We live in the age of abundant data. Through technology, more data is available, and the processing of that data easier and cheaper than ever before. But to realize the true value of this wealth of data, data leaders must rethink assumptions, processes, and approaches to managing, governing, and stewarding that data.

Joining Dr. De Leenheer during his session will be Barbara Latulippe, chief data governance officer, Dell Technologies. Dr. De Leenheer and Ms. Latulippe will outline how to capitalize and exploit data assets, including a discussion about what data leaders must do to make their data easy to find, easy to understand, and easy to trust.

**Who:** Pieter De Leenheer, Co-founder & Vice President, Research Education, Collibra  
Barbara Latulippe, Chief Data Governance Officer, Dell Technologies  
**What:** Presentation: "Governance and Stewardship in the Big Data Era"  
**Where:** [2017 MIT Chief Data Officer and Information Quality Symposium](#)  
Massachusetts Institute of Technology  
Cambridge, MA  
**When:** Thursday, July 13, 2017  
1 p.m. ET

**About Collibra**

As the leader in data governance, Collibra helps organizations across the world gain competitive advantage by maximizing the value of their data across the enterprise. Collibra is the only solution purpose-built to address the gamut of data stewardship, governance, and management needs of the most complex, data-intensive industries. Our flexible and configurable cloud-based or on-premises solution puts people and processes first – automating data governance and management to quickly and securely deliver trusted data to the business users who need it.
