

**GE and COMAC sign MOU to jointly explore and collaborate on digital solutions and applications on customer & product support monitoring & diagnostics**  
**Tuesday, November 15, 2016 04:03:14 PM (GMT)**

- This agreement brings the cooperation between COMAC and GE to a new level from the aircraft engines and systems to now broadening their relationship to the use data and analytics to bring greater operational efficiency to their operations.
- Under the agreement, COMAC and GE plan to jointly explore and collaborate on digital solutions and applications on customer & product support monitoring & diagnostics, Intelligent Aircraft and Brilliant Manufacturing. The two companies will set up a joint team to launch pilot projects based on an earlier outcome based workshop and exchanges to verify the technical trends for further collaboration.
- "This agreement with COMAC will enable our teams of software architects and aviation domain experts to jointly develop digital solutions at GE's Shanghai digital collaboration center," said Jim Daily, chief digital officer for GE Aviation. "The partnership between COMAC and GE will result in digital solutions that will transform COMAC's operations all the way from brilliant manufacturing to advanced flight analytics to comprehensive fleet operations support."
- Through the partnership, data scientists, software developers and architects from GE and COMAC plan to work together to refine some of the ten billion data points produced by the aviation sector annually into solutions that can achieve greater fleet intelligence and operational insights.
