

## **Trusteer Helps Huntington Bank Protect Customers from Cybercrime**

**Wednesday, February 01, 2012 02:31:00 PM (GMT)**

Bank offers Trusteer Rapport to its Customers for Free to Protect Against Account Takeover and Financial Fraud

[Trusteer](#), the leading provider of cybercrime prevention solutions, today announced that Huntington Bank (NASDAQ: HBAN; [www.huntington.com](http://www.huntington.com)) is using Trusteer Rapport and Trusteer Pinpoint to protect its commercial and retail banking customers against online fraud. Trusteer's vast cybercrime prevention network, which spans hundreds of organizations and tens of millions of endpoints, automatically protects banks like Huntington against threats that first target other, often larger, Trusteer customers.

"Huntington is committed to safeguarding the security of our customers' accounts, which is why we are offering Trusteer as a free download from our website," said Jeff Dennes, senior vice president responsible for Huntington's online banking. "Trusteer Rapport protects our customers from account takeover and financial fraud and makes it extremely difficult for criminals to compromise online banking sessions, yet does not change the user experience for our customers."

The Huntington National Bank, founded in 1866, provides full-service commercial, small business, and consumer banking services in six Midwestern states: Ohio, Michigan, Pennsylvania, Indiana, West Virginia, and Kentucky. Huntington is using Trusteer to provide its customers with transparent endpoint protection against advanced malware and phishing attacks.

Trusteer Rapport provides several layers of protection that prevent malware from:

- Exploiting browser and add-on vulnerabilities
- Installing itself on the device
- Capturing credentials and personal information entered in the browser
- Initiating fraudulent transactions or tampering with in-process transactions

"Protecting computers used by commercial and retail customers for online banking is the frontline in the battle against cybercrime and fraud," said Rakesh Loonkar, president of Trusteer. "Trusteer Rapport and our Cybercrime Prevention Architecture enable Huntington to block sophisticated financial malware from compromising web banking sessions and provide fraud prevention controls that meet the new FFIEC guidelines."

### **About Trusteer**

Trusteer is the leading provider of endpoint cybercrime prevention solutions that protect organizations against financial fraud and data breaches. Hundreds of organizations and millions of end users rely on Trusteer to protect their computers and mobile devices from online threats that are invisible to legacy security solutions. Trusteer's Cybercrime Prevention Architecture combines multi-layer security software with real-time threat intelligence to achieve sustainable protection against malware and phishing attacks on web applications and meet regulatory compliance requirements. Leading organizations such as HSBC, Santander, The Royal Bank of Scotland, SunTrust and Fifth Third are among Trusteer's clients. [www.trusteer.com](http://www.trusteer.com).
