

Verizon Enterprise Solutions dealing with data breach -- KrebsonSecurity
Thursday, March 24, 2016 06:51:59 PM (GMT)

- KrebsonSecurity reports that a member of an underground cybercrime forum is advertising the sale of a database containing the contact information of ~1.5M Verizon Enterprise customers.
- Verizon Enterprise subsequently told KrebsonSecurity that it had indeed recently identified a security flaw in its site that permitted hackers to steal customer contact information. It is in the process of notifying customers.
