

Facebook was aware of security flaw that led to September 2018 data breach, documents show -- Telegraph

Sunday, February 09, 2020 07:53:47 PM (GMT)

- Legal documents show that Facebook was repeatedly warned by its own companies as well as outsiders about a dangerous security flaw that led to the September 2018 data breach, when personal data was stolen from millions of users.
- Internal documents released as part of a lawsuit against Facebook show that the company had repeatedly failed to sufficiently address concerns raised as early as December 2017.
