ANN ARBOR, Mich., Oct. 16, 2018 /PRNewswire/ -- Domino's Pizza, Inc. (NYSE: DPZ), the largest pizza company in the world based on global retail sales, announced results for the third quarter of fiscal 2018, comprised of strong growth in same store sales, global store counts and earnings per share. Domestic same store sales grew 6.3% during the quarter versus the year-ago period, continuing the positive sales momentum in the Company's domestic business. The international division also posted positive results, with same store sales growth of 3.3% during the quarter. The third quarter marked the 99th consecutive quarter of positive international same store sales growth and the 30th consecutive quarter of positive domestic same store sales growth. The Company also had third quarter global net store growth of 232 stores, comprised of 173 net new international stores and 59 net new domestic stores. Global retail sales increased 8.3%, or 10.4% without the negative impact of changes in foreign currency exchange rates. Diluted EPS was \$1.95 for the third quarter, which was up 65.3% over the Company's diluted EPS in the prior year quarter.

During the third quarter of 2018, the Company repurchased 397,490 shares of its common stock pursuant to its Board of Directors approved open market share repurchase program for approximately \$109.1 million.

In addition to the \$0.55 quarterly dividend paid on June 29, 2018, the Company's Board of Directors also declared a \$0.55 per share quarterly dividend for shareholders of record as of September 14, 2018, which was paid on September 28, 2018. Additionally, on October 11, 2018, the Board of Directors declared a \$0.55 per share quarterly dividend for shareholders of record as of December 14, 2018, to be paid on December 28, 2018.

"I continue to be proud of our great franchisees and operators around the world. In particular, our U.S. business once again executed at extremely high levels in the third quarter. Our global business, driven by strong retail sales growth and franchisee economics that outperformed the industry, continued its strong momentum," said **Ritch Allison**, Domino's Chief Executive Officer.

 - Revenues increased \$142.3 million, or 22.1%, in the third quarter of 2018. The Company adopted Accounting Standards Codification 606, Revenue from Contracts with Customers ("ASC 606") in the first quarter of 2018. This resulted in the recognition of \$82.5 million in domestic franchise advertising revenues during the third quarter of 2018 related to contributions from domestic franchisees to Domino's National Advertising Fund Inc. ("DNAF"), the Company's consolidated not-for-profit advertising fund. In 2017, under accounting standards in effect at that time, the Company had presented these contributions net with the related disbursements in its consolidated statement of income. Refer to the "Adoption of New Accounting Guidance" section on page three for additional information related to the adoption of this accounting standard. The remaining increase in revenues was due primarily to higher supply chain volumes resulting from order and store count growth. Higher domestic franchise revenues, domestic Company-owned store and international franchise revenues resulting from higher retail sales also contributed to the increase.
 - **Net Income** increased \$27.7 million, or 49.2%, in the third quarter of 2018. This increase was driven by higher global royalty revenues and higher supply chain volumes. Additionally, the sale of 12 domestic Company-owned stores to a franchisee in the third quarter of 2018 resulted in a pre-tax gain

on sale recorded in general and administrative expenses of \$5.9 million. A lower tax rate resulting from regulations under the Tax Cuts and Jobs Act of 2017 (the "2017 Tax Act") and higher excess tax benefits from equity-based compensation as compared to the prior year also positively impacted net income in the third guarter through a reduction in the provision for income taxes.

• **Diluted EPS** was \$1.95 for the third quarter versus \$1.18 in the prior year quarter. This represents a \$0.77 or 65.3% increase over the prior year quarter. Diluted EPS was \$1.95 for the third quarter versus diluted EPS, as adjusted, of \$1.27 in the prior year quarter, which represents a \$0.68 or 53.5% increase over the prior year quarter. These increases were driven by higher net income, as well as lower diluted share count, primarily as a result of the share repurchases made during the trailing four quarters. (See the *Financial Results Comparability* section on pages three and four and the *Comments on Regulation G* section on page five.)

Adoption of New Accounting Guidance

The Company adopted ASC 606 during the first quarter of 2018. ASC 606 requires a gross presentation on the consolidated statement of income for franchisee contributions received by and related expenses of DNAF, the Company's consolidated not-for-profit advertising fund. Under prior accounting guidance, the Company had presented the restricted assets and liabilities of DNAF in its consolidated balance sheets and had determined that it acted as an agent for accounting purposes with regard to franchise store contributions and disbursements. As a result, the Company historically presented the activities of DNAF net in its consolidated statement of income and consolidated statement of cash flows. Under the requirements of ASC 606, the Company determined that there are not performance obligations associated with the franchise advertising contributions received by DNAF that are separate from its domestic royalty payment stream, and as a result, these franchise contributions and the related expenses are presented gross in the Company's consolidated statement of income and consolidated statement of cash flows. While this change materially

impacted the gross amount of reported franchise revenues and expenses, the impact is generally expected to be an offsetting increase to both revenues and expenses such that the impact on income from operations and net income is not expected to be material. Refer to the Company's Form 10-Q for the fiscal quarter ended September 9, 2018 for additional information regarding the adoption of ASC 606.

The Company also adopted ASU 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash* ("ASU 2016-18") during the first quarter of 2018, which requires that restricted cash and cash equivalents be included as components of total cash and cash equivalents as presented on the statement of cash flows. The Company historically presented changes in restricted cash and cash equivalents in the investing section of its consolidated statement of cash flows. This new guidance did not impact the Company's financial results, but did result in a change in the presentation of restricted cash and restricted cash equivalents within the consolidated statement of cash flows. Refer to the Company's Form 10-Q for the fiscal quarter ended September 9, 2018 for additional information regarding the adoption of ASU 2 016-18.

Financial Results Comparability

Financial results for the Company are significantly affected by changes in our capital structure, our effective tax rate and the adoption of new accounting guidance. Our recapitalization transactions have resulted in higher net interest expense due primarily to higher net debt levels, as well as the amortization of debt issuance costs associated with the repayment of certain of the Company's notes. Additionally, repurchases and retirements of the Company's common stock have reduced our weighted average diluted shares outstanding. A lower statutory tax rate due to the enactment of the 2017 Tax Act has resulted in a reduction in our provision for income taxes in 2018. Finally, the adoption of ASC 606 materially impacted the gross amount of reported domestic franchise advertising revenues and expenses. Domestic franchise advertising revenues do not have a cost of sales component, so changes in revenues have a disproportionate effect on the Company's operating margin.

In addition to the above factors impacting comparability, the table below presents certain other items that affect comparability between 2018 and 2017 financial results. Management believes that including such information is critical to an understanding of the Company's financial results for the third quarter of 2018 and the three fiscal quarters of 2018 as compared to the same periods in 2017 (See the *Comments on Regulation G* section on page five for additional details).

Free cash flow, as reconciled below to net cash provided by operating activities, as determined under accounting principles generally accepted in the United States of America ("GAAP"), was approximately \$197.4 million in the three fiscal quarters of 2018.

Comments on Regulation G

In addition to the GAAP financial measures set forth in this press release, the Company has included non-GAAP financial measures within the meaning of Regulation G, including free cash flow metrics and measures related to items affecting comparability between fiscal quarters and other fiscal periods. The Company has also included metrics such as global retail sales growth and same store sales growth, which are commonly used statistical measures in the quick-service restaurant industry that are important to understanding Company performance.

The Company uses "Global retail sales" to refer to total worldwide retail sales at Company-owned and franchise stores. The Company believes global retail sales information is useful in analyzing revenues because franchisees pay royalties and advertising fees that are based on a percentage of franchise retail sales. The Company reviews comparable industry global retail sales information to assess business trends and to track the growth of the Domino's Pizza[®] brand. In addition, supply chain revenues are directly impacted by changes in franchise retail sales. Retail sales for franchise stores are reported to the Company by its franchisees and are not included in Company revenues.

The Company uses "Same store sales growth," which is calculated by including only sales from stores that also had sales in the comparable period of the prior year. International same store sales growth is calculated similarly to domestic same store sales growth. Changes in international same store sales are reported excluding foreign currency impacts, which reflect changes in international local currency sales.

The Company uses "Diluted EPS, as adjusted," which is calculated as reported Diluted EPS, adjusted for the items that affect comparability to the prior year periods discussed above. The most directly comparable financial measure calculated and presented in accordance with GAAP is Diluted EPS. The Company believes that the Diluted EPS, as adjusted, measure is important and useful to investors and other interested persons and that such persons benefit from having a consistent basis for comparison between reporting periods. The Company uses Diluted EPS, as adjusted, to internally evaluate operating performance, to evaluate itself against its peers and in long-range planning. Additionally, the Company believes that analysts covering the Company's stock performance generally eliminate these items affecting comparability when preparing their financial models, when determining their published EPS estimates and when benchmarking the Company against its competitors.

The Company uses "Free cash flow," which is calculated as cash flows from operations less capital expenditures, both as reported under GAAP. The Company believes that the free cash flow measure is important to investors and other interested persons, and that such persons benefit from having a measure which communicates how much cash flow is available for working capital needs or to be used for repurchasing debt, making acquisitions, repurchasing common stock, paying dividends or other similar uses of cash.
