**AGENDA17: Computerworld names Alan Stukalsky a Premier 100 Technology Leader**
**Monday, March 20, 2017 12:05:00 PM (GMT)**

ATLANTA, March 20, 2017 /PRNewswire/ -- IDG's Computerworld announced Alan Stukalsky, chief digital officer for Randstad North America , as a 2017 Premier 100 Technology Leader. The program highlights 100 leaders in both the technology and business roles for their exceptional technology leadership and innovative approaches to business challenges.

"I'm honored to be included with so many talented honorees from across all industries," said Alan Stukalsky, chief digital officer at Randstad North America. "Whereas technology used to be more of a supporting vehicle in the recruiting industry, Randstad is proud to have integrated technology as an effective and driving force for change within our organization."

As Chief Digital Officer, Stukalsky is responsible for leveraging digital tools, big data and artificial intelligence to create industry leading solutions. He is also instrumental in integrating the company's marketing strategies with its sales and delivery approach. Stukalsky has a strong focus on digitizing processes and improving interactions with clients, talent and employees to help foster successful interactions within the company. He looks to new products, social technology and analytics to move the company forward, and he plays an integral role in conceptualizing and implementing Randstad's global infrastructure.

"The Premier 100 awards program highlights the exceptional work of an elite group of IT executives who are leading their organizations through times of unprecedented change. They are using technology to drive high-stakes business projects and create dynamic growth in their organizations," said Scot Finnie, editor in chief of Computerworld. "These 100 men and women are not only strategic business thinkers, but also team leaders who recognize the importance of recruiting and retaining the brightest talent to enable digital transformation and harness the opportunities of cloud, big data, mobile and social. We're pleased to recognize their leadership and honor their achievements."

The Premier 100 awards ceremony will be one of the highlights of the AGENDA17 Conference held March 20 - 22, 2017, at the Sawgrass Marriott Golf Resort & Spa, Ponte Vedra Beach, Florida . The Conference, to be attended by more than 300 influential business and senior IT executives, will focus on building the digital business.

The Premier 100 program was created in 2000 to spotlight individuals who have had a positive impact on their organizations through technology. These are individuals who manage internal IT organizations, mentor and motivate their IT teams and business colleagues, create a positive work environment, envision innovative solutions to business challenges and effectively manage and execute IT strategies. Each year, nominees are invited to complete a questionnaire that addresses a number of topics, including their background and experience and their attitude toward risk and innovation. Using Computerworld's IT Leader Index, which is a measurement of how closely an individual matches our definition of the IT Leader, we analyze the data. Each year, 100 honorees are selected to receive this life-time recognition award. Information on previous honorees can be viewed at:
