Verizon to Host June 12 Webinar on Key Healthcare Challenges
Monday, June 10, 2013 12:30:00 PM (GMT)

BASKING RIDGE, N.J., June 10, 2013 /PRNewswire/ -- Verizon Enterprise Solutions will host a webinar --
Healthcare Challenges: Can Collaboration and Compliance Co-Exist? Improving Patient Care While
Protecting Sensitive Data -- on Wednesday (June 12). Leading healthcare experts will discuss how
healthcare organizations can securely embrace innovations in technology to help improve efficiency and
support patient care.

WHEN:	Wednesday, June 12 11:15 am - 12:15 p.m. ET
WHERE:	Via NetConference Register at https://enterprise.verizon.com/HealthcareChallengesWebinar/Registration?
WHO:	**Dr. Peter Tippett**, chief medical officer and vice president, Verizon Innovation Incubator **Dr. William Braithwaite**, leading expert on health information security and privacy **David Holtzman,** senior health IT and privacy specialist, U.S. Department of Health and Human Services, Office for Civil Rights
BACKGROUND:	The webinar also will explore trends highlighted in the "Verizon 2013 Data Breach Investigations Report" that can impact sensitive patient health data. Verizon experts will examine the security requirements healthcare organizations must address when implementing a hosted infrastructure environment within the parameters of the Health Insurance Portability and Accountability Act.

Verizon offers a comprehensive portfolio of managed, IT and consulting services for the healthcare industry
to help transform patient care delivery, enhance access to care and better manage costs.
